DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. ^{16-17, 22} Claims ~~1-22~~, 27-37 and 40-43, drawn to a dietary supplement composition comprising nutritionally effective amounts of at least six saccharides, wherein said saccharides are selected from a first group of saccharides consisting of: galactose, glucose, mannose, xylose and acetylated mannose; and a second group of saccharides consisting of: N-acetylneuraminic acid, fucose, N-acetylgalactosamine, N-acetylglucosamine, arabinose, glucuronic acid, galacturonic acid, iduronic acid and arabinogalactan, wherein said composition comprises at least one saccharide selected from said first group of saccharides and at least one saccharide selected from said second group of saccharides, classified in class 536, subclass 123, for example.
 - II. Claims 23-26, drawn to a dietary supplement composition for providing nutritional product saccharides, comprising nutritionally effective amounts of acetylated mannose, gum ghatti, gum tragacanth, glucosamine, corn starch and arabinogalactan, classified in class 514, subclass 811 or in class 514, subclass 922, for example.

Art Unit: 1651

- III. Claims 44-45, drawn to a dietary supplement composition for providing nutritionally effective amounts of tragacanth gum, gum ghatti, arabinogalactan and *Aloe vera* extract, classified in class 424, subclass 744, for example.
- IV. Claims 46-47, drawn to a dietary supplement composition for providing nutritionally effective amounts of *Aloe vera* extract, gum ghatti, tragacanth gum, glucosamine, corn starch and arabinogalactan, classified in class 536, subclass 114 or in class 536, subclass 128, for example.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the four different inventions are directed to five different compositions comprising different ingredients in different amounts. Different compositions comprising different ingredients would be expected to have different functional effects as evidenced by the claims themselves.

3. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1651

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michele Flood whose telephone number is (703) 308-9432. The examiner can normally be reached on Monday through Friday from 7:15 am to 3:45 pm.
